This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

AN INTRODUCTION

TO

TOWN'S ANALYSIS.

The only Spelling Book which should be put into the hands of American children, "being recommended by men of the highest reputation in our country," as decidedly superior to any other work of similar design, in the whole compass of our Elementary literature." (*See 1st and 2d pages of the Book.*) Approved and recommended by the nation in the following resolution, adopted in the House of Representatives at Washington, 13th December, 1838:

"*Resolved*, That in consideration of the superior excellence of *Town's* Spelling Book, which is so happily arranged as to teach the *meaning* at the same time it does the *spelling* of words, we strongly recommend it to all our schools, as the *National uniform Spelling Book*."

RECOMMENDATIONS.

From Rev. GEORGE BUSH, *Prof. of Hebrew and Oriental Literature, New York City University.*

From a *thorough examination* of Town's Spelling Book, particularly in its new and last revised form, I have no hesitation, in considering it as *decidedly* superior to any other work of similar design, with which I am acquainted, in the whole compass of our Elementary Literature. The original design of the book is eminently happy, and the execution shows it to have been carried out, in a manner equally to be admired.

GEO. BUSH.

From *Charles Anthon, L. L. D.* Prof. of Languages in Columbia College, New York, and author of that invaluable series of *Classical School Books*, published by Harper and Brothers, and now used with the highest approbation both in America and Europe.

I have examined Town's Spelling Book with considerable care, and have *every reason* to be pleased with the work. So far SUPERIOR is it, in fact, to other Spelling Books that I feel *no hesitation whatever* in recommending it to general patronage.

CHARLES ANTHON.

From Rev. WILLIAM R. WEEKS, D. D. *well known* as one of the most *competent* and *successful* Teachers in our Country.

Mr. Taylor, Sir.—As you have requested me to give you my opinion of Town's Spelling Book, I can state, that I have used it in my school for several months, and think it *decidedly* the best Spelling Book with which I am acquainted. And I have no doubt that in its present thoroughly revised form, it will deserve to be ranked FIRST amongst our elementary works.

Newark, April 11. 1839. WILLIAM R. WEEKS.

NATIONAL RECOMMENDATION.

A copy of the work having been previously put into the hands of *each* member of Congress, and examined, the following *Resolution* was *unanimously* adopted in the HALL OF REPRESENTATIVES, at Washington, Dec. 13, 1838. Hon. Wm. Cost Johnson, of Maryland, being in the chair.

"*Resolved*, That in consideration of the *superior* excellence of TOWN'S Spelling Book, which is so happily arranged as to teach the *meaning*, at the same time it does the *spelling*, of words, we strongly recommend it to all our schools, as the NATIONAL UNIFORM SPELLING BOOK."

From Rev. ALEXANDER PROUDFIT D. D. Corresponding Secretary of the New York City Colonization Society. Colonization Rooms, N. Y. April 11, 1838.

I have examined the Spelling Book, now presented to the public by Salem Town, and can with freedom say that it supplies a great desideratum in the study of the English Language. Indeed, its general introduction into our Common Schools, will in my opinion, constitute a *new era* in the history of Elementary Literature, and therefore, with great pleasure I recommend it to the patronage of an enlightened and liberal public.

ALEX. PROUDFIT.

EXTRACT FROM THE NEW YORK EVANGELIST.

Town's Spelling Book is unquestionably superior in its plan to any other Spelling Book of the English Language ever published, and must eventually take the place of every other. We commend the work to the immediate notice of school committees men, examiners, and teachers.

We the Inspectors and Commissioners of common schools in the city of Albany,

fully concur in the character given of the above work in the New York Evangelist, and recommend its introduction into the common schools in this State.

Daniel D. Winne, Zenas Cobb,
Samuel N. Pays, James Taylor
James Henry,

BEALLSVILLE, *Fred. Co. Md.* Sep. 15, 1838.

MR. J. O. TAYLOR, Sir,—Your favour came to hand, together with a copy of Mr. Town's Spelling Book. I have examined it, and can only say it is, in my opinion, decidedly the very book which ought to be introduced into every school house in our country. It is far superior to any spelling book, as it teaches the meaning of words—and is indeed the book which has long been wanted, to make all other school books better.

Most respectfully yours,
WILLIAM METZGER.

MIDDLEBURG, Va., March 22d. 1839.

J. ORVILLE TAYLOR, Dear Sir,—I shall ever feel indebted to you for directing my attention to Town's works, the "Spelling Book" and "Analysis." Within the last six months I have introduced Town's Spelling Book in my seminary. I regard it as a high honor that I am, probably, the first to make it known south of the Potomac.

WM. F. BROADDUS, Prin. of Male and Female Sem.

TERRE HAUTE, In. Jan. 7. 1839.

J. O. TAYLOR, Dear Sir,—I have the pleasure to state that 'Town's Spelling Book' has received the unqualified commendation of teachers and parents in this region; and although it is difficult to persuade parents to change a school book, yet in this instance it has been voluntary.

ERASTUS FLINT.

Among the hundreds of teachers who now use this work (and it is used to a considerable extent in most of the States, as over 80,000 copies have been sold within the last six months) it is believed those who have thoroughly tested its merits concur in its value.

J. ORVILLE TAYLOR, Sec. of A. C. S.

Extracts from the Report of the Regents of the University of the State of New York to the Legislature, March, 1837, from the Albany Argus.

"Town's Analysis of the derivative words of our language has been introduced and *very thoroughly tested;* it is evidently a *very valuable work* connected with the acquisition of language. The very ingenious plan of first collecting and defining those parts *separately*, which enter into the composition of *so many thousand words*, results in the saving of a *vast amount of time and labor*. By this simple process the mere English scholar, IN A FEW WEEKS AT FARTHEST, learns most of those foreign parts, &c., which has cost the classical scholar MANY YEARS of laborious study to acquire.

HOW TO MAKE A READING PEOPLE.

Youth, heretofore, have studied *words*—have learned their spelling and pronunciation, *but not their meaning;* and hence, in after life, they feel little interest in *reading*, as the ideas of the author are but partially observed. But by learning the *meaning* of words in "TOWN'S SPELLING BOOK," they will, in maturer age, feel a deep interest in reading, for the book will then be understood.

PREFACE.

In presenting to the Public a new elementary work, for the use of Schools, the Author feels bound, briefly to assign the reasons which have prompted him to an undertaking, that might, at first view, appear to be superfluous. These reasons, he trusts, will be deemed sufficiently valid, to free him from the imputation of having engaged in a service uncalled for.

The principle, which he considers as lying at the foundation of all good teaching, is, that a child being taught, both to read and to spell, *should* be taught at the same time, to *understand* what he reads and spells. It is this principle, which has suggested the plan of the present work. He would not deny, that some advantages may accrue from the mere mechanical exercise of spelling, and storing the memory with words which as yet, convey no sense. He is ready to admit, that it is better for the mind to be *thus* furnished, than *not to be furnished at all;* but as words are the *signs* of ideas, and the ultimate object of acquiring *words* is, to acquire *ideas*, and a medium of imparting them to others, it is not easy to say, why this end should not be kept in view, through every stage of the learner's progress.

All the spelling books now in use, follow out the same uniform plan, of arranging words according to their sounds and syllables, irrespective of their import. On that plan, they are generally well executed, and would admit of little improvement.

But if the above principle be well founded, something is still requisite, beyond a mere judicious arrangement and correct orthography, to answer the grand purposes of elementary instruction. It is plain, that as far as practicable, the knowledge of the *sign*, and of the *thing signified*, should be acquired together, inasmuch as *both* are to hold an inseparable connection in the mind.

OF LANGUAGE, ITS ELEMENTS AND FORMATION.

The human voice is an audible sound, made by the organs of speech.

The main organs of speech, are the tongue, teeth, palate, and lips, aided by the breath.

Speech is the faculty of uttering articulate sounds.

Articulate sounds are the distinct utterance of letters, syllables, or words.

Language is a medium by which we receive, and impart ideas.

Language was spoken, long before it was written.

Spoken language is a combination of articulate sounds, denoting ideas, or things.

Letters are characters presented to the eye, in a written language, to indicate the variety of sounds, heard in a spoken language.

Written language is a combination of words, used by common consent, for signs of ideas.

The letters in the English language are twenty-six, and are called the English Alphabet. (See page 11th.)

Each letter, except h, represents one, or more distinct sounds.

These seven double letters, ch, gh, ng, ph, sc, sh, and th, denote simple, or compound sounds.

The alphabet is divided into vowels and consonants.

A vowel is a letter, that can be sounded alone, as a, e, o; which are pure vowels. i and u are vowels, or have the power of diphthongs. w and y are vowels, or consonants.

A diphthong is the union of two vowels in the same syllable, both of which are sounded, as oil. (See page 16th.)

A digraph is the union of two vowels in the same syllable, only one of which is sounded, as bread. (See page 16th.)

A triphthong is the union of three vowels in the same syllable, two of which are mute, as in adieu.

A consonant cannot be sounded alone. b, makes, be.

Digitized by Google

Consonants are divided into mutes, semi-vowels, and liquids.

A mute emits no sound without a vowel. They are, b, d, k, p, q, t, and c and g hard.

Semi-vowels emit a slight sound alone. They are, f, h, j, l, m, n, r, s, v, x, z, ch, sh, th, and c and g soft.

A liquid easily unites with a mute. They are, l, m, n, r.

Those consonants whose sounds mainly depend on the lips, are called labials, as b, f, m, p, v, w.

Those whose sounds depend on the teeth, are called dentals, as j, s, z, ch, sh, and c and g soft.

Those whose sounds depend on the tongue, are called linguals, as k, q, x, ng, c and g hard.

Letters form syllables, syllables form words, words form sentences, and sentences form language, written, or spoken.

A syllable is one letter, as a, or a union of letters, as man.

No syllable can be formed without a vowel, or diphthong. Orthography treats of the power of letters, and teaches how to write, or spell words correctly.

Orthoepy teaches the correct pronunciation of words.

Spelling is correctly naming the proper letters of a word, in the order of the syllables

Monosyllables are words of one syllable.

Dissyllables are words of two syllables.

Trisyllables are words of three syllables.

Polysyllables are words of four or more syllables.

Accent is a more forcible stress of voice, on some particular syllable in all words, having more syllables than one.

When the accent falls on a vowel, the sound of that vowel is long, as hō-ly.

When the accent falls on a consonant, the preceding vowel is short, as man′-ner.

Accent is primary, or full; secondary, or slight, as on the word, ad″-ver-sa′-ry.

Words are primitive, as man, or derivative, as manly.

Words are simple, as horse, or compound, as horse-shoe.

A sentence is such a combination of words, as being read in connection, makes good sense. The close of such a sentence is marked by a period.

Digitized by Google

Reading is pronouncing written words in succession.

Cadence is a fall of the voice at the end of a sentence.

Emphasis is a greater stress of voice, on one or more words in a sentence, to mark the *sense* of the expression.

SOUNDS OF THE VOWELS.

No scholar should neglect to learn the following key of sounds, prepared by Doctor Webster, and adapted to the use of his Dictionaries. The Doctor marks the sounds thus:

ā, marks the long sound of each of the vowels, as lāte.

ă, flat sound of a, as băr.
ạ, broad sound of a, aw, au, as fạll.
a, short broad sound, as in whạt.
ę, like ā, as in prey, vein.
ĭ, like ē long, as in pĭque.
c, like k, as in cap.
ğ, like j, as in ğem.
ĭ, ŏ, like u short, as bĭrd, dŏve.
ö, like oo, as in möve.
o, like oo short, as in book.
u, like oo short, as in full.
ų, ų, like yu, as in use.
čh, like sh, as in čhaise.
s, like z, as in his.

See page 15th of vowels.

a, has five sounds, as in bāne, ban, bär, bạll, wạn.

e, has four sounds, as in mēte, met, they, hĕr.

i, has four sounds, as in tīne, tin, shïre, dĭrt.

o, has five sounds, as in nōte, not, möve, dŏve, book.

u, has three sounds, as in tūbe, tub, bush, (except busy, bury.)

y, has two sounds, as in type, lynx.

w, has a diphthongal sound of u, in dew, and ou, in prow.

In a few cases, i has the power of y consonant, as in pillion.

In a few words, u, combines the sound of y consonant, as in use, or has the power of w, as in assuage.

w and y are consonants, when they begin a word, or syllable; but vowels at the end; w excepted in blow, flow, &c., where it is a mere servile. y is also excepted, in larynx, zephyr, beryl, yttria. y unaccented at the end of a word, or syllable, (with few exceptions, as occupy,) slides into the sound of e, as in vanity, unless preceded by f, as in satisfy.

SOUNDS OF THE CONSONANTS. (Mute means silent.)

b, has one sound, as in *but*. Before t, and after m, it is mute, as in de*b*t, lam*b*.

c, has four sounds. 1st, like k, before a, o, u, l, r, t, as *cat*. 2d, like s, before e, i, y, as *cent*. 3d, like sh, when followed by e, or i, before another vowel, as *social*. 4th, like z, in *suffice*. c, is sometimes mute, as in *c*zar, victuals.

d, has one sound, as in *den*. When e is suppressed in the termination *ed*, after c, f, h, k, p, q, s, x, the sound slides into t, as in fixed (fix't.) ed, after t, d, is not suppressed. d is mute before g, in the same syllable, as fa*d*ge, and in a few other cases.

f, has one sound, as in *fat*, (*of*, excepted.) It is never mute.

g, has two sounds. 1st, it is hard before a, o, u, l, r, as *gun*. 2d, soft before e, i, y, as *gem*. (The 2d has many exceptions.) g is mute before m, and n, as in phle*g*m, *g*naw.

h, is a mark of strong breathing, as in *his*, and is mute after g and r, as in g*h*ost, r*h*eum.

j, has one sound, as in *june*, and is never mute.

k, has one sound, as in *kite*, and is always mute before n, in the same syllable, as in *k*nife.

l, has one sound, as in *lip*. It is frequently mute before f, k, m, and sometimes before v, d.

m, has one sound, as in *man*, and is never mute. (*m*nemonics excepted.)

n, has two sounds. 1st, a simple sound, as in not. 2d, a compound sound, like ng, as in *sank*. At the end of words, after l, m, it is mute, as in kil*n*, hym*n*.

p, has one sound, as in *pit*. When it begins a word before n, s, it is mute, as in *p*salm, *p*neumatics.

q, has the power of k, is followed by u, and never mute.

r, before a vowel has a rough sound, as in *run*, and after a vowel, a smooth sound, as in *lard*.

s, has four sounds. 1st, like soft c, as in *sin*. 2d, like z, as in *was*. 3d, like zh, as in *pleasure*. 4th, like sh, as in *tonsure*; also when followed by i, and preceded by a

owel, as in *session*. s, is mute in a few words, as in sland.

t, has two sounds. 1st, a natural sound, as in *ten*. 2d, ike sh, before i, when followed by a vowel, as in *motion*. n a few words it is like tsh, as in *fustian*. t is mute before h, in the same syllable, as in fetch.

v, has one sound, as in *vine*, and is never mute.

w, before a vowel, h and r, is a consonant, as *wet*, *when*; efore r, it is mute, as in *w*rote.

x, has three sounds. 1st, like ks, as in *wax*. 2d, like z, as in *exact*. 3d, like z, as in *Xerxes*.

z, has two sounds. 1st, its own sound, as in *zest*. 2d, ike zh, in *glazier*. The sharp consonants are p, f, t, s, k, nd flat ones b, v, d, z.

DOUBLE LETTERS.

ch, has three sounds. 1st, like tsh, as in *church*. 2d, ike k, as in *chaos*. 3d, like sh, as in *machine*.

sh, has one sound, as in *shine*.

th, has an aspirate, or breathing sound, as in *thin*; and n open, or vocal sound, as in *thou*.

gh, has the sound of f, as in laugh, with but few exceptons, as hough (hok.) It is mute, as in h*i*gh, l*i*ght.

ph, always has the sound of f, as in *phenix*. (Stephen excepted.)

ng, has a nasal sound, as in *rang*, except when g is softned into j, as in *range*.

sc, has two sounds. 1st, like sk, before a, o, u, l, r, as *scale*. 2d, like s, before e, i, y, (scirrous excepted.)

CERTAIN TERMINATIONS PRONOUNCED THUS.

cion, sion, tion, are pronounced (shun.) cient, tient,(shent:) ious, cious, tious, scious, (shus.) cial, sial, tial, (shal.) ian, cian, tian, (shan.) science, tience, (shense.)

geous, gious, (jus.) geon, gion, (jun.) ous, (us.) and ics, (ks.)

Some words ending in chre, or cre, sound (cur, or cer.) bre, (bur.) tre, (tur.) vre, (vur.) as acre, sabre, nitre, livre.

EXPLANATIONS FOR THE TEACHER.

By an *abstract* definition, we mean such an one, as imparts the signification of a word, in itself considered, irrespective of its applications, or uses. Thus, Dr. Webster defines congruence, coincidence, harmony, stipulation, and covenant, by the same word, *agreement*, which is a correct definition of each of the above words, when taken independently of the *sense*, in which they severally imply, *agreement*. It is, therefore, an *abstract* definition. Dr. Webster says "In school dictionaries, we must necessarily omit subordinate senses, and particular uses." Accordingly we find by computation, he has, in his school dictionary, defined about 9,000 words, by one, or by two others of synonymous import, all of which are *abstract* definitions. Walker has defined about 11,000 in the same manner, and Johnson 8,000.

When the best abstract definition is learned, the child will readily perceive the different applications of such words wherever he sees, or reads them in their proper connection with others. Thus, *acuteness*, is defined by *sharpness*, without specifying in *what* it consists, or to *what* it applies whether the sharpness of a knife, of vinegar, of pain, or perception. But when the scholar reads of the acuteness of a man's perceptions, the acuteness of sounds, or the acuteness of the pain in his tooth, he instantly perceives the particular *sense*, in which *acuteness*, in each case, implies *sharpness*.

The knowledge of words, like all other knowledge, can be acquired perfectly, in *no way* short of a successive and gradual advancement, step by step, from the first plain and literal signification, up to the figurative senses, and varied applications.

MODE OF SPELLING AND DEFINING.

In the following spelling lessons, when there are but two columns, each word in the *first* one, is to be defined by its opposite one in the *second*, using the word *implies*, or such

Digitized by Google

expression, as would be applicable; thus, *fruition*, (implies) *enjoyment*. If there are three columns, the word in the *first* is defined by the other two words, standing opposite, in the *second* and *third* columns, thus; *lively*, (implies) *active* or *brisk*.

The class will, therefore, study and spell ALL the words in each column, but *only define* those in the *first* column, according to the following examples. To the definition thus given in the *book*, the pupils will add what more they can; or the teacher may, and *ought* to exercise them, in giving examples of the *different senses* in which the word may properly be used.

EXAMPLE OF TWO COLUMNS.

gallantly, bravely.	defraud, cheat.
compound, mixture.	disperse, scatter.

Defined thus: *gallantly*, (implies) *bravely*. A *compound*, (implies a) *mixture*. To *defraud*, (implies to) *cheat*. To *disperse*, (implies to) *scatter*.

EXAMPLE OF THREE COLUMNS.

concise, brief, short.	fissure, chasm, cleft.
palid, pale, wan.	labor, toil, work.

Defined thus: *concise*, (implies) *brief* or *short*. *Palid*, (implies) *pale* or *wan*. A *fissure* (implies a) *chasm* or *cleft*. To *labor*, (implies to) *toil* or *work*.

In defining adjectives and adverbs, the scholar may say, (implies.) In defining nouns, (implies a.) But in defining verbs, (implies to;) or he may substitute such other *terms*, as his teacher thinks most applicable in the case.

Every child in his course of instruction in primary schools, is required to spell the *tables of words* in his book, *many* times, over and over again; and it is scarcely *possible*, he should be exercised *each time*, according to the above method, without distinctly acquiring *one* or *more* of the prominent, leading significations of a great majority of those words. And we think it cannot be shown, that such a course would not lay the EARLIEST and the BEST foundation, the *age* of the scholar *will admit*, to become well versed in a knowledge of the English language.

Digitized by Google

The scholar need not be confined exclusively to the words of collateral meaning, in the columns, but may name such other words of relative import, or explanatory sentences, as may occur to him. This will be a useful exercise, which a little practice will render both easy and interesting.

Let the following be kept in view in aid of pronunciation, and the exceptions that occur will readily be noticed.

ea, ei, ie, in roman letters, are like the 1st sound of *e*; as fear, seize, tier.

ea, ie, with *a*, *i*, in italic, are like the 2d sound of *e*; as dead, friend.

ea, ei, with *e*, *i*, italic, resemble the 1st sound of *a*; as pear, vein.

ei, has several exceptions; as counterfeit, sovereign, &c.

oa, ou, ow, oe, with *a*, *u*, *w*, *e*, italic, are like the 1st sound of *o*; as to*a*st, s*ou*l, flo*w*, toe.

eau, ue, ieu, ui, with *ea*, *e*, *ie*, *i*, in italic, are like the 1st sound of *u*; as b*eau*ty, tr*ue*, adi*eu*, fr*ui*t.

ou, with *o*, italic, is like the 2d sound of *u*; as in c*ou*ntry.

ou, in roman, and marked 1, is like *oo*; as soup 1.

eau, in roman, is like the 1st sound of *o*; as beau.

ai, ay, are generally like 1st sound of a; as pain, day.

ie, with *e*, italic, is like 2d sound of *i*, in mischief, except as a termination, where it has the 1st sound of *i*; as pi*e*, di*e*, &c.

ui, with *u*, italic, is like 1or 2d sound of *i*; as b*ui*lt g*ui*de.

o, in the termination *ous*, is silent.

e, final, is either silent, or serves to lengthen a foregoing vowel.

French *i*, like *ee*, is marked 2, as pique 2.

Digitized by Google

In the terminations, gue, que; ue is mute, except in ague, argue. In most other cases, ue final, is like ū, as in due, true.

arch, before a vowel, is like k, as arch-angel. Before a consonant, it is like tsh, as in arch-bishop.

ei, before n, gn, gh, ght, in the same syllable, and ey under accent, are commonly like ā, as in rein, deign, eight, they; sometimes like ē, in seize, or short ĭ, in height.

oa, is like ō, in boat, with few exceptions, as broad. eo is like ē, in people, or short ŭ, in surgeon.

aw, au, sound as in law, cause, except au, in aunt, with few others.

ay, is like ā, except quay, says, aye. ai is the same, with few exceptions.

oi, oy, under accent, are as in oil, boy, with few exceptions of oi.

i before ve, in the termination ive, is usually short, as in motive.

ea is like ē, in fear; e short in head, or a in heart.

ui, is like w, in languid; u is mute in guile, and a diphthong in juice.

(1.) When the boys had found the nest, they did not see how they should get up to it, it was so high.

(2.) But one boy, whose name was Pe-ter Price, said he would climb the tree.

(3.) Then he got a board, and put one end of it on the tree, and stood up on the board, and was now nearly as high as the limb on which the nest was.

(4.) Then he sprang up, and crept with his hands and knees a-long the limb of the tree til[l] he got near the nest.

(5.) But just as he put out his hand to take the nest, the limb broke, and down came Pe-ter, and the nest, and the eggs; and far off the poor bird flew, and they saw no more of her.

Some men are very good, and some are very bad.

Men have hands to help each other, but they sometimes use them to hurt and kill each other.

When men are kind, and do all they can to help each other, they are happy. When they are unkind, and are so bad and wicked as to injure or hurt each other, they are unhappy.

Some men fight or quarrel, tell lies, steal, swear, break the Sabbath, and do many other wicked things.

If all men loved each other, and would do all they could to make each other happy, what a good world we should have

Children, will you not be kind and good to each other, so as to be happy, and to set a good example to men and women?

If all children should be good, and try all they can to help each other, when they come to be men and women, and all the wicked people die, then the world would be good and not go to war, and fight and kill each other.

See the chickens round the gate,
For the morning portion wait;
Throw some crumbs, and scatter seed,
Let the hungry chickens feed.
Call them—O how fast they run!
Gladly, quickly——every one.

LESSON 1.

A good boy may grow up to be a good man. Do you not wish to be a good boy, and learn to read your book? Take your book and come to me. Now see how well you can read it.

LESSON 2.

When you come from school you should not stop to play by the way. That is what bad boys do. Take your book home that you may read. This will make you a wise man.

LESSON 3.

Jane made me a nice plum cake. Do you love cake with plums in it? What will you do with your cake? You must not eat too much at one time, it may make you sick. Do not eat too much.

LESSON 4.

Good boys and girls will try to spell and read well.
They will not soil nor tear their books.
You should keep your face and hands quite clean.
And when at school, keep your seat and try to learn.

LESSON 5.

Men raise good wheat on good land.
Good wheat makes good bread and good cakes.
The cows eat grass and hay and give good milk.
Good milk makes good cheese. Do you love cheese?

LESSON 6.

All men have gone out of the way.
No man can say I have done no ill.
It is not right to speak one bad word.
You should not hurt your mates at play.

LESSON 7.

When the sun is up it is day. When the sun goes down it is night. The sun makes it light. The earth goes round the sun once in a year. The moon goes round the earth once in a month.

The greatest wisdom of speech, is to know when, and where, and what to speak.

The great business of man is to do good.

Lesson 1.

The earth is not quite round. It is not as long from north to south, as it is from east to west. The sun and stars shine with their own light, but the moon does not. The moon is not as large as the sun. It is not so far from us as the sun. Each star you can see, is as large or larger than the sun. The stars are so far from us that it makes them look small. You could not count all the stars in a year.

Lesson 2.

When the wind blows hard, it makes great high waves on the sea. One wave may be a mile long, and as high as a house. When they run so high, the ships will rise and fall, and roll from side to side, so that you could not stand on your feet. How should you like to be in a ship, when the winds blow so hard, and make such high waves.

Lesson 3.

The wind is air in motion. You can not see the wind, but you can see how it makes the trees bend and the snow fly. We could not breathe, nor live, if there was no air. The fire could not burn wood to keep us warm, if there was no air. The birds could not fly, and ships could not sail, and the boys could not raise the kite. You could not hear me speak, nor hear the bell ring, nor hear one sound, if there was no air. There could be no fog, nor rain, nor hail, nor snow, nor clouds, if there was no air. You could not see the fine rain-bow nor the green grass. Are you not glad that God made the air?

God makes the ground bring forth fruit for man and beast.

THE GOLDEN RULE.

To do to others as I would
That they should do to me,
Will make me honest, kind, and good,
As every child should be.

I never need behave amiss,
Nor feel uncertain long,
As I may always know by this,
If things are right or wrong.

It is more prudent to overlook trivial offenses than to quarrel about them.

When you lose your integrity you have lost your character.

A liar is seldom believed even when he speaks the truth.

Reading Lesson.

One day in the month of March, when the sun shone very bright, and it was quite warm, Mr. Shaw was walking in the door-yard, and his little son Peter came to him. Now Peter loved his father very much, because he was so kind to tell him what he had a desire to know. Peter, my son, said Mr. Shaw, when it is noon, the sun is exactly south. It is March now, and in March, the sun rises exactly in the east, and sets exactly in the west. Now tell me, said Mr. Shaw, which way is north. Peter thought a little, and pointing where the sun rises, said, that is east. Then pointing towards the sun said, that is south, father, if it is just noon. Then pointing where the sun would set, said, that is west; and north must be just opposite to the sun at noon. You are right, said Mr. Shaw to Peter, you are right. Now, said Mr. Shaw to Peter, if you should go west far enough, you would come to the great Pacific Ocean. Now, Peter, you may always know which way to look for the Pacific Ocean. If you should go east, you would come to the Atlantic Ocean. If you should go east, across the Atlantic Ocean, you would come to Europe. Just south of Europe, lies Africa, and east of Europe, is Asia. But if you should go west, across the Pacific Ocean, you would come to Asia, just as well as to go east. This could not be, unless the earth was round, like your ball. If you should go south, you would come to South America. Now, said Mr. Shaw to Peter, if you will point your finger towards Europe, Asia, Africa, South America, the Pacific Ocean and the Atlantic Ocean, you shall have a new book. Peter had been so careful to hear all his father said, that he could point his finger exactly towards each one, and felt quite as much pleased with what he had learned as with his book.

Avoid speaking evil of persons; if you can say nothing in their favor you had better be silent.

Good breeding consists in a respectful behavior to all.

Do to others as you would be done by.

Reading Lesson.

A vessel is a great ship made to sail on the ocean.

Some ships will hold more men than the largest house you ever saw. Some times they collect many ships, and when they are all together, call them a fleet. Then they will fill them with men called sailors, and take cannon, and powder, and balls, and swords, and pistols, and sail out on the ocean. If they meet another fleet, then they commence fighting.

How the cannon balls will then fly, and tear the ships, and cut down the sailors. During all this time the captain runs from place to place, crying out in a voice like thunder, "boys, don't give up the ship." Then comes the tug of war, when the men try to get each others' ships.

Reading Lesson.

When you can read well, you must get a his-to-ry, and read all the sto-ries. A his-to-ry is a book that tells you what great men have done, and what kings and na-tions have done, in all ages, and in all parts of the world. How they have had great ar-mies, and made them fight, and kill each other. A great ar-my would fill the road many miles, as thick as the folks come out of the meet-ing house. They have can-non, as big as a small log, that will shoot a ball, as large as your head, and they have guns, and swords, and pis-tols. Then they some-times wear red coats, and high caps with feath-ers on them, and have drums and fifes, and the horses prance and snort. You could not count all the men and horses in one whole year. Now, do you not think it is ver-y wick-ed, for men to get to-geth-er in such great ar-mies, and fight and kill one an-oth-er because some great cap-tain or king tells them they must? Some-times they be-come so en-raged at each oth-er, they will put a whole hat full of balls in-to the can-non at once, and shoot them a-mongst the thick-est of the men. If they come near e-nough, they will cut off their heads with their swords, or run their swords quite through their bo-dies, if they can get a chance, till great heaps of dead men lie a-bout on the ground so thick you could hard-ly walk with-out tread-ing on them.—Some, with a leg or arm shot off, groan-ing and bleed-ing, and try-ing to crawl a-way. O, what a dread-ful sight this would be. Now, if you get a his-to-ry, and read it, you will learn more of the wars than I could tell you in a month.

How man-y poor lit-tle boys and girls have had their fa-thers kill-ed in the wars, and then their mo-thers must work so hard, to take care of the poor lit-tle fa-ther-less child-ren. Are you not sor-ry?

The people who live in Lapland, make their bread from the inside bark of pine trees. The South Sea Islanders have the bread tree. This tree grows as tall as the oak, and bears a fruit about the size of a large apple. When the fruit is ripe, it is cut in slices, and baked upon hot stones.

It would appear quite strange to us, if we were to see bread baked in this way.

When children learn words, they should learn the idea they are designed to impart.

Section 1.

Saxon Nouns and Classical Adjectives.

The noun and its adjective of corresponding import. In most cases the child will know the primitive noun in each second column.

The adjectives, in each first column, are defined by repeating the words at the head of their respective columns, with the primitive word in the second column, standing opposite to its adjective. Thus, over *formic* stand "*pertaining to*," then *formic* is defined by saying "*pertaining to ants.*" So *dorsal*, "pertaining to the back." Now define all the adjectives by such words as head their columns, in the same manner, using *a*, or *the*, with the *singular* or *plural*, as elegance of expression requires.

The love of money is the root of all evil. Wisdom is of more value than wealth.

Avoid speaking evil of persons, if you can say nothing in their favor you had better be silent.

Be careful *what* you say, in the presence of strangers, as they may be inclined to take advantage of an unguarded expression, to injure your character.

If you would become a good, great, and wise man, be sure to begin while you are young.

Lesson No. 8.

Columbus was supposed to be the first man who sailed across the Atlantic ocean. He came from Spain, in Europe. Spain is easterly, where you see the sun rise. The people in Europe did not know of this great continent where we live, till Columbus sailed west from Spain across the Atlantic ocean, and found it. When he found it, there were a great many Indians on it.

Did you ever see an Indian? How do you think they came here? They could not wade through the sea, and come from Europe in that way. The longest rope you ever saw would not reach to the bottom of the sea. They could not build ships. They had no such saws nor axes as we have, to cut down trees and make them into boards. They had no knives nor forks to eat with. They could not read as we do.

They had no books. They had no great cities, nor houses. They wandered about in the woods, and slept on the ground, or in small huts, called wig-wams. Some times they hunted deer with bows and arrows.—They had stone arrows, stone knives, and stone axes, and pounded their corn in stone mortars. Once they were here where we now live, but the white men have driven them off, and got the land where they used to hunt.

Poor Indians!—are you not sorry for them?—When you can read well enough, you must get some books that will tell you many stories about them. How King Philip, who was a great Indian warrior, went about with his other Indians and killed the white folks, and burned their houses and towns, and carried away a great many little children.

Reading makes a full man; writing makes a correct man; conversation makes a ready man, and *thinking* makes a great man.

It is characteristic of a great mind, to inquire into the reason and cause of things.

THE GRAVE YARD.

Perhaps, in this neglected spot, is laid
Some heart, once pregnant with celestial fire;
Hands, that the rod of empire might have sway'd,
Or wak'd to ecstasy the living lyre:

But Knowledge to their eyes her ample page,
Rich with the spoils of time, did ne'er unroll;
Chill penury repressed their noble rage,
And froze the genial current of the soul.

Section 1.

Compound Classical Adjectives, and mostly Saxon nouns.

The first part of each word, in the first column, has the same meaning as the word against it in the second column; therefore, by repeating the word or words standing at the head of the column, with whatever stands in the second column, against each succeeding word, defines each word in the first column. Thus, *Bearing* heads the first column. Then to define *armigerous*, say *bearing arms; cauliferous, bearing stems.*

I will go to my tent, and lie down in despair;
I will paint me with black, and will sever my hair;
I will sit on the shore, where the hurricane blows,
And reveal to the god of the tempest my woes;
I will weep for a season, on bitterness fed,
For my kindred are gone to the hills of the dead;
But they died not by hunger, or lingering decay;
The steel of the white man hath swept them away.

Education.

What is a good education? We hear much about it. Who will tell us what it is? Every child in school expects to obtain it. But it is necessary that they should know what it means.

Is it to get lessons well, and to excel in every study? This is a part, but not all. Some make great progress for a time, and then become indolent. Others are distinguished while they go to school,—but when they leave it, cease to improve.

Is it a knowledge of books? Yes, and something more. It is possible to possess learning, and be ignorant of necessary things. There was a lady who read many books, yet did not know if her dress was in a proper condition, and could not always find her way home, when she went abroad.

Is it to cultivate the intellect? This is not enough. It must also strengthen the moral principles, and regulate the affections. It must fit for the peculiar duties that devolve upon us. It must keep in just balance, and bring forth to healthful action, all the powers that the Creator has given us.

A good education, is that which prepares us for our future sphere of action. A warrior or a statesman, requires a different kind of training from another, or the instructress of a school. A lady who has many accomplishments, yet is deficient in the science of housekeeping, has not been well educated.

A good education makes us contented with our lot. This, was what an ancient philosopher said, made him happy in an obscure abode, and when he was alone, talked with him. A restless and complaining temper proves a bad education.

A good education is a fortune in itself. I do not mean that it will always secure wealth. But it brings some-

hing better than the gold that perishes. For this may be suddenly lost. Fire may consume it. Water may overwhelm it. The tempest may destroy it. The thief may take it away.

But that knowledge which enriches the mind, which moderates its desires, which teaches to make a right use of time, and to promote the happiness of others, is superior to the elements. Fire, air, earth, and water, have no power over it. It can rule them as servants. It fears neither rust nor robber. It walks with us into the vale of years, and does not leave us till we die.

What a great evil is ignorance! We can see this by the state of those countries where it prevails. The history of past times will show us how miserable were their inhabitants,—how unfit to judge for themselves,—how stubborn in wickedness, how low in their pleasures,—how ready to be the prey of the designing.

Look at the man who can neither read nor write. How confused are his ideas! How narrow his conceptions! How fixed his prejudices! How dependent is he on others to convey his sentiments, and to interpret their own! How liable to mistakes! How incapable of forming just and liberal opinions! Ignorance has been truly called the mother of error.

A good education is another name for happiness. We all desire to be happy, and should be willing to take pains to learn how. He who wishes to acquire a trade or a profession,—to build a house, or to cultivate a farm, or to guide a vessel over the sea, must expect to work as an apprentice, or to study as a scholar. Shall we not devote time and toil to learn how to be happy? It is a science which the youngest child may begin, and the wisest man is never weary of. If we attain the knowledge of many languages, and the fame of great learning, yet fail in that which makes the heart and the life good,

our knowledge is but "sounding brass, and a tinkling cymbal."

NATIONAL EDUCATION.

1. How is a nation to grow rich and powerful? Every one will answer, By cultivating and making productive what nature has given them. So long as their lands remain uncultivated, no matter how rich by nature, they are still no source of wealth; but when they bestow *labor* upon them, and begin to plough and sow the fertile earth, they then become a source of profit.

2. Now, is it not precisely the same case with the natural powers of *mind?* So long as they remain uncultivated, are they not valueless? Nature gives, it is true, to the mind, *talent*, but she does not give learning or skill; just as she gives to the soil *fertility*, but not wheat or corn. In both cases the labor of man must make them productive.

3. Now, this labor applied to the mind, is what we call *education*, a word derived from the Latin, which means the educing or bringing forth the hidden powers of that to which it is applied. In the same sense also we use the word *cultivation*: we say, "*cultivate* the mind," just as we say "*cultivate* the soil."

4. From all this we conclude that a nation has two natural sources of wealth; one, the *soil* of the nation, and the other the *mind* of the nation. So long as these remain *uncultivated*, they add little or nothing to wealth or power.

5. Agriculture makes the one productive, education the other. Brought under cultivation, the *soil* brings forth wheat and corn and good grass, while the weeds and briars, and poisonous plants, are all rooted out; so *mind* brought under cultivation, brings forth skill and learning, and sound knowledge and good principles; while ignorance, and prejudice, and bad passions, and

evil habits, which are the weeds and briars and poisonous plants of the mind, are rooted out and destroyed.

6. An ignorant man, therefore, adds little or nothing to the wealth of the country, an educated man adds a great deal; an ignorant man is worth little in the market, his wages are low because he has got no knowledge or skill to sell. Thus in a woollen factory a skilful workman may get $10 or $15 a week, while an unskilled workman must be content with $2 or $3.

7. In a store or counting-house, one clerk gets $1,000 salary, because he understands book-keeping or the value of goods, while another, who is ignorant, gets nothing but his board.

8. We see this difference, too, when we look at nations. Thus China has ten times as many inhabitants as England, but England has a hundred times as much skill; therefore England is the more powerful of the two, and frightens the government of China by a single ship of war.

9. Thus, too, among the nations of Europe, Prussia is more powerful and prosperous than any other of the same size on the continent, because all her people are educated, and that education is a *Christian* one, making them moral and industrious, as well as skilful.

10. If, then, the education of the people be necessary to the prosperity of the nation, it is the duty of the government or nation to provide for it: that is, to see that no child grow up in ignorance or vice, because that is *wasting* the productive capital of the country.

11. This education, too, should be a Christian education, in order that children when they grow up should be honest, faithful and temperate; for if a man be a liar or a drunkard, his knowledge and skill is worth little to the country, because he will be neither trusted nor employed.

What is that, Mother?

What is that, Mother?
The lark, my child.—
The morn has but just looked out, and smiled,
When he starts from his humble, grassy nest,
And is up and away with the dew on his breast,
And a hymn in his heart, to yon pure, bright sphere,
To warble it out in his Maker's ear.
Ever, my child, be thy morn's first lays
Tuned, like the lark's, to thy Maker's praise.

What is that, mother?—
The dove, my son.—
And that low, sweet voice, like a widow's moan,
Is flowing out from her gentle breast,
Constant and pure by that lonely nest,
As the wave is poured from some crystal urn,
For her distant dear one's quick return.
Ever, my son, be thou like the dove,—
In friendship as faithful, as constant in love.

What is that, mother?—
The eagle, boy,
Proudly careering his course of joy,
Firm in his own mountain vigor relying,
Breasting the dark storm, the red bolt defying;
His wing on the wind, and his eye on the sun,
He swerves not a hair, but bears onward, right on.
Boy, may the eagle's flight ever be thine,
Onward and upward, true to the line.

What is that, mother?
The swan, my love.—
He is floating down from his native grove,
No loved one now, no nestling nigh;
He is floating down by himself to die;

Death darkens his eye, and unplumes his wings,
Yet the sweetest song is the last he sings.
Live so, my love, that when Death shall come,
Swan-like and sweet, it may waft thee home.

Active Christian Benevolence the Source of sublime and lasting Happiness

Wouldst thou from sorrow find a sweet relief?
Or is thy heart oppressed with woes untold?
Balm wouldst thou gather for corroding grief?
Pour blessings round thee like a shower of gold.—
'Tis when the rose is wrapt in many a fold
Close to its heart, the worm is wasting there
Its life and beauty; not when, all unrolled,
Leaf after leaf, its bosom, rich and fair,
Breathes freely its perfumes throughout the ambient air.

Wake, thou that sleepest in enchanted bowers,
Lest these lost years should haunt thee on the night
When death is waiting for thy numbered hours
To take their swift and everlasting flight;
Wake, ere the earth-born charm unnerve thee quite,
And be thy thoughts to work divine addressed:
Do something—do it soon—with all thy might;
An angel's wing would droop if long at rest,
And God himself, inactive, were no longer blest.

Some high or humble enterprise of good
Contemplate, till it shall possess thy mind,
Become thy study, pastime, rest, and food,
And kindle in thy heart a flame refined.
Pray Heaven for firmness thy whole soul to bind
To this thy purpose—to begin, pursue,
With thoughts all fixed, and feelings purely kind;
Strength to complete, and with delight review,
And grace to give the praise where all is ever due.

Rouse to some work of high and holy love,
And thou an angel's happiness shalt know,—
Shalt bless the earth while in the world above;
The good begun by thee shall onward flow
In many a branching stream, and wider grow;
The seed that, in these few and fleeting hours,
Thy hands unsparing and unwearied sow,
Shall deck thy grave with amaranthine flowers,
And yield thee fruits divine in heaven's immortal bowers.

DEATH OF AN INFANT.

Death found strange beauty on that cherub brow,
And dashed it out. There was a tint of rose
On cheek and lip;—he touched the veins with ice,
And the rose faded. Forth from those blue eyes
There spake a wishful tenderness,—a doubt
Whether to grieve or sleep, which innocence
Alone can wear. With ruthless haste, he bound
The silken fringes of their curtaining lids
For ever. There had been a murmuring sound,
With which the babe would claim its mother's ear,
Charming her even to tears. The spoiler set
His seal of silence. But there beamed a smile
So fixed and holy from that marble brow,—
Death gazed, and left it there;—he dared not steal
The signet-ring of Heaven.

THE FAMILY BIBLE.

How painfully pleasing the fond recollection
Of youthful connections and innocent joy,
When, bless'd with parental advice and affection,
Surrounded with mercies, with peace from on high,
I still view the chair of my sire and my mother,
The seats of their offspring as ranged on each hand,

And that richest of books, which excelled every other—
That family Bible, that lay on the stand;
The old-fashioned Bible, the dear, blessed Bible,
The family Bible, that lay on the stand.

That Bible, the volume of God's inspiration,
At morn and at evening, could yield us delight,
And the prayer of our sire was a sweet invocation,
For mercy by day, and for safety through night.
Our hymns of thanksgiving, with harmony swelling,
All warm from the heart of a family band,
Half raised us from earth to that rapturous dwelling,
Described in the Bible, that lay on the stand;
That richest of books, which excelled every other—
That family Bible, that lay on the stand.

Ye scenes of tranquillity, long have we parted;
My hope's almost gone, and my parents no more;
In sorrow and sadness I live broken-hearted,
And wander unknown on a far distant shore.
Yet how can I doubt a dear Saviour's protection,
Forgetful of gifts from his bountiful hand!
O, let me, with patience, receive his correction,
And think of the Bible, that lay on the stand;
That richest of books, which excelled every other—
The family Bible, that lay on the stand.

PART II,

BEING AN INTRODUCTION TO "TOWN'S ANALYSIS."

Suggestions to Teachers.

No scholar can be said to have accomplished any thing valuable for himself, till he thoroughly understands what he studies, and perceives the application. It is therefore hoped, that teachers will not fail to question and explain to their pupils every particular. Although this part of the work is very much simplified, and brought down, as it is thought, entirely to the capacities of children, yet much, very much depends on the *oral* instruction of the *living* teacher.

In the first place those questions, answers and examples at the head of each table, with such rules as are occasionally referred to, must be distinctly learned as they occur. In these, the class must be exercised, till each pupil understands them perfectly. When this is accomplished, let the teacher give such number of primitive words for the class to spell, as they can learn well, with their definitions. Not to be so learned one day, that they may be forgotten the next, but to be learned for life. When the scholar has spelled the primitive word, and defined it, let the teacher put to him the same word with what is to be joined to it, and require the pupil to spell and define it thus modified. Lastly, tell the part or parts of speech. Let the same course be uniformly pursued, on the commencement of every new table.

Digitized by Google

After the scholars become familiar in answering the questions, as proposed by the teacher, let him give out the primitive word, and require his pupils to go through the whole process alone. In this way, three or six months, will be likely to accomplish the work of years. Words, language, and signification, will become equally familiar. The prefixes and suffixes, component parts of sixty thousand words at least, will all be learned for the entire language, and for life.

In the first part, the scholar acquires a knowledge of most of the primitive words in the language, and in the second, rules and examples for forming and defining a large amount of compound and derivative words now in use.

This little volume is most respectfully dedicated to teachers of common schools, to parents of families, and the rising generation of our common country, by their sincere friend,

THE AUTHOR.

Aurora, Cayuga County, N. Y.

N. B. The second part of this work, was first published in a separate form, and has uniformly had more benefits ascribed to its use, by able and experienced teachers, so far as knowledge of language is concerned, than all other aids they have ever employed.

SPELLING BOOK.

RULES.

1.* Silent *e*, when the final letter, must be dropped before the addition of suffixes, beginning with a vowel; as *debate*, then deba*table*.

Words ending in *ge* or *ce*, are exceptions; as *change*, *peace*, then change*able*, peace*able*,

2. Silent *e*, final, is retained before *ment*, *less*, *ly*, and *ful*; except argue, awe, due, judge, lodge, true and acknowledge, where it is dropped; as argu*ment*, du*ly*, aw*ful*, &c.

3. When the letter *y* terminates a primitive word, or occurs in any of the derivative forms, and in either case, another letter or suffix is added, *y* is commonly changed into *i*, except before *ing*, as, comely, comeli*ness*.

In some cases it is changed into *e*, as, duty dute*ous*, But when *y* is preceeded by a vowel, it is retained; as, boy, betray, then boy*ish*, betray*ed*, except lay, pay, say, &c.

4. Monosyllables and words accented on the last syllable ending with a single consonant, preceded by a vowel, double that consonant before an additional syllable beginning with a vowel; as rob, rob*ber*, swim, swim*mer*, &c. *X* and *k* are never doubled.

When a diphthong precedes, or the accent is *not* on the last syllable, the consonant is *not* doubled; as, boil, boil*er*, visit visit*ed*, with some few exceptions.

* The 1st, 2d, and 5th rules, are by permission, taken from Prof. Bullions' excellent treatise on English Grammar. A work of peculiar excellence.

5. When *t* or *s* precedes *e* final, in such words as admit, *tion* or *sion*, *e* is dropped, and the suffix is *ion*, as, legate, lega*tion*, expanse, expans*ion*; *t* or *s* final, take *ion*.

TABLE I.

Now let the teacher commence, by proposing his questions to the class *distinctly*, and by explaining their answers, till each scholar fully comprehends the design and application.

Let this direction be invariably followed, on the commencement of every *new table*.

One word is given at the head of every new table as an example of what follows.

All the primitive words in the first table are nouns, or defined as such, and *less* converts them into adjectives.

Question. What is a noun?

Answer. The name of any thing; as man, book, virtue

Q. What is an adjective?

A. A word joined to a noun, to express its quality, or assist in designating the thing meant; as a *sweet* apple a *sour* apple, a *pleasant* apple; sweet, sour and pleasant express the *quality* of apple.

Q. What is a suffix?

A. A letter or letters, syllable or syllables appended to the end of a word, to add force, vary or modify its signification; as fruit, then fruit*less*.

Q. What does *less* mean, at the end of a word?

A. It means *without*, *destitute of*, or *wanting*.

Q. What then does fruit*less* mean?

A. *Without* fruit, or *destitute* of fruit

TABLE II.

Q. What does *ful* mean at the end of a word, as fruit*ful*.

A. It means *full of*, *full*, *adundance*, or *having much*.

Q. What then is the meaning of fruit*ful* ?

A. It means *full of* fruit, *abundance of* fruit, or *much* fruit.

Q. What change do *ful* and *less* give to the import of words ?

A. *Ful* expresses abundance of what the primitive implies ; and *less*, a want of, or destitution.

In this table, the primitives are defined as *nouns*, and *ful* converts them into adjectives.

PUNCTUATION AND CAPITAL LETTERS

Punctuation.

Punctuation is the art of dividing a written composition into sentences, or parts of sentences, by points or stops, to mark the different pauses which the sense requires.

The principal points are the

Comma, thus	,	Interrogation, thus	?
Semicolon,	;	Exclamation	!
Colon	:	Parenthesis,	()
Period.	.	Dash	—

A comma denotes a pause as long as the reader would be in pronouncing the word, *and*

A semicolon denotes a pause as long as two commas.

A colon denotes a pause as long as three commas.

A period denotes a pause as long as four commas; it shows that a sentence is complete.

An interrogation point denotes that a question is asked.

An exclamation point denotes astonishment.

A parenthesis includes a part of a sentence, which might have been omitted without injuring the sense, and must be read in an altered and lower tone of voice.

A dash denotes a sudden stop, or change in the subject.

The following characters are also frequently used in composition.

An apostrophe, thus ' denotes the omission of a letter; as, *lov'd* for *loved*.

Digitized by Google

A caret, thus, ▵ denotes where to take what was left out by mistake; as thus *frm.*

A hyphen, thus, - connects the parts of a compound word; as, *lap-dog.*

A quotation, thus, " " denotes that the passage is taken from some other author, in his own words.

An index, thus, ☞ points to a passage important to be noticed.

A paragraph, thus, ¶ denotes the beginning of a new subject.

A star, thus, * and other marks, as †, ‡, §, ‖, and sometimes the letters of the alphabet, and figures, refer to the margin or bottom of the page.

Capital Letters.

Capital letters should be used:

1. At the beginning of every book, chapter, note, and sentence.

2. At the beginning of appellations of the Deity; of proper names of persons, places, seas, rivers, ships; and of adjectives derived from proper names.

3. At the beginning of most quotations, and of every line of poetry.

4. The pronoun *I*, and interjection *O*, should be written in capitals.
